## How it all started...

As is often the case, inspiration sparks when you encounter a daily problem and there is no suitable solution available. Trudie and Evert Zuiddam developed the RIZZ outdoor mat because Trudie found that existing doormats simply didn't align with her carefully styled luxury house and were practically inadequate. After several years of dedicated development, the family successfully introduced the ultimate outdoor mat in 2006, which remains a testament to their vision and perseverance.

Our Dutch family business, founded in 1941, takes pride in producing a unique range of durable luxury products. With a commitment to in-house design and traditional craftsmanship, we have consistently maintained and monitored the superior quality of our products that defines our brand.
